

For the WebEx Polls

**Slide 19:**

Global distribution definitions.

- **Are the definitions for low, moderate, and high risk appropriate?**
- **Can you provide some suggestions for improving the definitions?**

**Slide 20:**

Temporal distribution definitions.

- **Are the definitions for low, moderate, and high risk appropriate?**
- **Can you provide some suggestions for improving the definitions?**

**Slide 21:**

Transmission from wild birds to domestic birds or other animal species.

- **Are the definitions for low, moderate, and high risk appropriate?**
- **Can you provide some suggestions for improving the definitions?**

**Slide 22:**

Waterfowl presence.

- **Are the definitions for low, moderate, and high risk appropriate?**
- **Can you provide some suggestions for improving the definitions?**

**Slide 23:**

Temperature and presence of ice/snow.

- **Are the definitions for low, moderate, and high risk appropriate?**
- **Can you provide some suggestions for improving the definitions?**

**Slide 24:**

Amount of surface water.

- **Are the definitions for low, moderate, and high risk appropriate?**
- **Can you provide some suggestions for improving the definitions?**

**Slide 25:**

Vegetation density.

- **Are the definitions for low, moderate, and high risk appropriate?**
- **Can you provide some suggestions for improving the definitions?**

**Slide 26:**

Please rank in order of importance.

1. Global distribution
2. Temporal distribution
3. Evidence of transmission to domestic birds
4. Waterfowl presence
5. Temperature and presence of snow/ice
6. Amount of surface water
7. Vegetation density
