African Swine Fever Reaches Southern China (Yunnan Province) & 2nd Outbreak in Zhejiang	Oct 22, 2018 08:08:05 CDT	Avian Flu Diary	4.0	4
Description				
#13,611 Until now, China's ASF epidemic has been concentrated in the Northeastern part of the country (see USDA map below, dated Oct 17th), with the bulk of the nation's 40+ outbreaks reported in Liaoning & Anhui Provinces. Today, China's MOA reports ASF for the first time in the southern province of Yunnan - representing a jump of well over 1000 km from the nearest previous outbreak - along with a re-occurrence in Zhejiang province. Two (translated) reports: First two outbreaks in Yunnan Pro...				
Bulgaria Detects 2nd Occurrence Of ASF Near Romanian Border	Oct 24, 2018 10:02:54 CDT	Avian Flu Diary	3.0	3
Description				
ASF Reports For 2018 - Credit OIE Maps #13,620 Bulgaria, which reported its first detection of African Swine Fever in late August of this year (see DEFRA Raises Risk Of Importing ASF To UK To `Medium') , reports their second detection - this time in a wild boar in Silistra - roughly 4 km from the Romanian border. While the recent introduction and spread of ASF in China has captured the world's attention, the inroads this virus has made in Europe this year (see map above) are equally concerning....				
China MOA: 3rd Southern Province (Guizhou) Reporting ASF This Week	Oct 25, 2018 10:02:54 CDT	Avian Flu Diary	4.0	4
Description				
Credit Wikipedia #13,621 After nearly three months of only afflicting northeastern provinces, in the past 4 days we've seen three of China's Southern Provinces report African Swine Fever outbreaks (Yunnan , Hunan , and today Guizhou). With more than a dozen provinces and/or territories now affected - and 4 new provinces reporting their first outbreak over the past 8 days - ASF appears to be well entrenched in China. First today's announcement from the MOA, then I'll return with a postscript...
