CEZD WEEKLY INTELLIGENCE REPORT

This intelligence report is based on the collective rating of information signals by the CEZD community, as acquired and selected from twenty-one disease news sources via the Knowledge Integration using Web-based Intelligence (KIWI) tool hosted on the Canadian Network for Public Health Intelligence (CNPHI) informatics platform. The report is based on the activities of the CEZD Community of Practice and subject to change based on evolving user needs.

Most Relevant Signals 2019.09.23 – 2019.09.29

1. **Disease:** African Swine Fever (ASF)  
**Species affected:** Swine  
**Location:** Asia  
**Community Relevance Rating:** 4.00  
**Number of weeks in intelligence report:** 48

**Description:** As the count of infected farms in South Korea increases to 9 and the Philippines declare yet another case of ASF, the disease continues to roll across Asia, with the 10th nation - East Timor - reporting its arrival. This represents a geographic jump of anywhere from 1500 km (from the Philippines) to nearly 2000 km (from Vietnam), and brings it uncomfortably close (400km) to Australia. ASF doesn't cross oceans without the help of humans, who may carry it via contaminated food products, exported contaminated feed, or even on their shoes or clothing, to new regions.

2. **Disease:** African Swine Fever (ASF)  
**Species affected:** Swine  
**Location:** Europe  
**Community Relevance Rating:** 3.00  
**Number of weeks in intelligence report:** 44

**Description:** African swine fever is ongoing in many countries of Eastern Europe such as Russia, Moldova, Bulgaria, Hungary, Ukraine and Romania. They have been reporting cases in wild boars as well as in their domestic population.
