CEZD WEEKLY INTELLIGENCE REPORT

This intelligence report is based on the collective rating of information signals by the CEZD community, as acquired and selected from twenty-one disease news sources via the Knowledge Integration using Web-based Intelligence (KIWI) tool hosted on the Canadian Network for Public Health Intelligence (CNPHI) informatics platform. The report is based on the activities of the CEZD Community of Practice and subject to change based on evolving user needs.

Most Relevant Signals 2019.10.07 – 2019.10.13

1. **Disease:** Unknown  
   **Species affected:** Swine  
   **Location:** Indonesia  
   **Community Relevance Rating:** 3.10

   **Description:** There have been circulating media reports of unexplained pig deaths in multiple regions of Indonesia, including: Minahasa Regency, North Tapanuli, and North Sumatera. The cause of these deaths is thought to be Classical Swine Fever, however official test results are yet to be released.
