The Beef Network links the diverse beef community to encourage and support integrated and whole-of-system beef health surveillance. Effective and responsive health surveillance safeguards the prosperity of Canada’s beef industry.

The Canadian Animal Health Surveillance System (CAHSS) Beef Network includes members from the National and Provincial beef councils/organizations/networks, Veterinary colleges, Provincial governments, CFIA, National and Regional Veterinary organizations/networks.

The Beef Network is part of the Canadian Animal Health Surveillance System (CAHSS), which connects animal health, public health and wildlife health experts from Canada’s animal sectors. In addition to the Beef Network, CAHSS member networks include AMU, aquatic, swine and dairy cattle, equine, poultry and wildlife. CAHSS members work on diseases and issues of concern, including reportable and zoonotic diseases, production limiting diseases and antimicrobial use surveillance.
