** CONTEXT**

The Wildlife Network links the diverse wildlife community to encourage and support integrated and whole-of-system wildlife health surveillance. Effective and responsive health surveillance safeguards the prosperity of Canada’s wildlife industry.

The CAHSS Wildlife Network includes members from the National and Provincial networks, Veterinary colleges, Provincial governments, CFIA and AAFC, National and Regional Veterinary organizations/networks.

The Wildlife Network is part of the Canadian Animal Health Surveillance System (CAHSS), which connects animal health, public health and wildlife health experts from Canada’s animal sectors. In addition to the Wildlife Network, CAHSS member networks include AMU, aquatic, swine and dairy cattle, equine, poultry and beef. CAHSS members work on diseases and issues of concern, including reportable and zoonotic diseases, production limiting diseases and antimicrobial use surveillance.
